## To Our Valued Customers

This price book covers the vehicles for which we supply a range of ARB manufactured products which includes our bull bars.

There are vehicles for which, whilst we have not as yet developed a bull bar, we still have a large range of accessories available such as lights, side steps, tow bars, Air Lockers, snorkels etc.

We are continually sourcing and designing new products to add to our range, so if your vehicle or a particular accessory is not listed here please enquire with one of our sales staff... we may have just what you're after.

Please note that whilst every effort is made to ensure the information contained in this book is accurate, ARB reserves the right to amend printing errors or incorrect information. ARB also reserves the right to change prices without notification.

(E & OE) Errors and Omissions Excepted. This price and application list is lovingly crafted by a dedicated team of specialists however, due to the complex nature of this price and application list inevitably human errors will occur therefore we reserve the right to correct any genuine errors, application errors and related issues. We will always be fair and reasonable if this results in a problem.

## Vehicle Compatibility

Please note that information contained in this guide is based on manufacturers' specifications at the time of print. Changes to vehicles or products may occur after this time that may render a certain accessory unsuitable for a particular application.

Vehicle model dates contained in this guide are indicative, so please exercise caution when ordering accessories if your vehicle's build date falls close to a model change date. If in doubt, please consult your ARB distributor, who can assist with determining the correct products for a particular vehicle.

The products detailed in this guide are fully compatible with air bag systems (when fitted), unless otherwise stated. For information on the technology behind our products, and how air bag compatibility is achieved please refer to the ARB catalogue.

## Removal Of Parts From Your Vehicle

Please note that in some cases, it may be necessary to remove parts from your vehicle in order to carry out the fitment of replacement parts and accessories.

In most cases, removal of these parts unavoidably destroys them and renders them unsuitable for re-use.

Original parts removed from your vehicle to allow for installation of replacement parts and accessories are disposed of on the same day as installation.

We are sorry but we are unable to store such parts on your behalf. If you wish to retain these parts, please inform us prior to the commencement of any work being carried out on your vehicle.

Please bear in mind that in most cases the removed parts are not suitable for transport inside your vehicle due to their size, nature and condition. Their loading and transport will be your responsibility in such circumstances.

## FREIGHT CHARGES

Prices shown in this book do not include any allowance for the cost of freight. In some states, territories and rural areas some additional freight costs can be expected.

## GST

Prices shown in this book are inclusive of GST.

## FITTING CHARGES

Fitting charges listed in this book are based on installation of accessories on brand new, unmodified vehicles using standard ARB supplied components such as switches and brackets etc.

Installation in older vehicles and/or vehicles with other aftermarket accessories, conversions or modifications which require additional fitment labour will incur additional charges.

Fitting charges are only applicable when the product is purchased and fitted at the same location and time. Fitting of any customer supplied product is chargeable on an hourly rate basis.

We suggest you discuss any such issues with our sales staff when placing your order.

## COLOUR CO-ORDINATION CHARGES

All ARB manufactured Protection Equipment is finished to the highest standard.

Once fully assembled our Protection Equipment is shot blasted, chemical pre-treated and phosphate washed then oven dried before a specially formulated, hard wearing, polyester powder is electrostatically sprayed and subsequently oven baked.

However, the choice is yours. If you would prefer to have the accessories coloured, a high quality automotive refinishing two-pack paint system is applied on top of the powder coat after it has been hand prepared by our expert staff, giving the accessories a very high quality, gloss finish. It is preparation such as this which will ensure our Protection Equipment will retain its visual appeal on your vehicle for many years.

Note: ARB Commercial Protection equipment is not designed to be colour coded and we do not recommend it.

ARB Canopies featuring a grained exterior come in a natural white finish. Colour coding is optional on these models. Smooth exterior canopies including Ascent, Classic, Classic Plus and Sport Lids must be colour coded.

For colour coded products, ARB utilises one of the finest paint systems available. However, with modern colours, and bearing in mind we are working to a colour code formula supplied by the paint company, due to possible variations in factory applied paint colours on your vehicle, we are unable to guarantee a 100% match. Please check with our sales staff. For some vehicle models we may recommend a contrast colour be supplied.

\*Colour Co-ordination of Kaymar products is only available for their Rear Step Tow Bars. Rear Wheel and Jerry Can Carriers for rear step tow bars and for standard bumpers are only available in the standard Kaymar finish.

## MISCELLANEOUS PRODUCT INSTALLATION AND SERVICE CHARGES

Labour charges indicated below are based on installation of accessories on brand new, unmodified vehicles using standard ARB supplied components such as switches and brackets etc. The installation charges DO NOT include the cost of the accessory, service parts or removal and replacement (R&R) of a winch.

Wherever possible we aim to provide a fixed price installation cost, however certain accessories may require additional labour. Winch R&R charges or accessory installation in vehicles with other aftermarket accessories, conversions or modifications, which require additional fitment labour will incur additional charges at the current hourly labour rate. Fitting of any customer supplied product is chargeable on an hourly rate basis. Consult your ARB workshop for vehicle specific installation requirements.

Fitting charges are only applicable when the product is purchased and fitted at the same location and time. Unless otherwise stated the price indicated includes workshop ancillary items e.g. bolts/nuts/screws, cable/cable ties/conduit/fuse, lubricants and oil disposal.

<sup>1</sup>Winch service is standard tear down and lubrication rebuild and does not include additional repair time or parts that may be required.

<sup>2</sup>Fitting charge is based on fitment to an ARB winch compatible bar.

<sup>3</sup>Please Note: This charge is in addition to the normal fitting cost for the winch bar. If a winch is fitted to a bar that has already been installed on a vehicle, the bar fitting cost is still incurred as removal and refitting of the bar is generally necessary. A winch fitting kit may also be required.

<sup>4</sup>Includes up to 6 metres of 6mm Auto cable.

<sup>5</sup>LINX Air Suspension Control fitting charge does not cover any fit time relating running of airlines, fitting of air bags or any other time related to air bag fitment

## GENERAL ACCESSORIES, RECOVERY EQUIPMENT, SOLAR KITS & ACCESSORIES

### ARB LINX VEHICLE ACCESSORY INTERFACE AND COMPONENTS

7450121	Fridge Extension Ariel, Suits (10900041) Fridge Connect Module, Add 0.50hr Fit Six-Channel Fused Relay Box 160mm x 93.7mm x 84.3mm, Add 1.0hr Fitting Charge, Incl: Pre-Installed Blade Fuses (3x20A, 2x10A, 1x5A) & 6x30A Rated Relay, 1xPre-Terminated Quick Connect Cable, 1x3m Extension Cable (Braided Cable Sleeve), 10xCableTies, 2xM6x20mm Hex Flanged Screws & M6 Locking Hex Nuts	34.00	Each
7450124	LINX Switchboard Relay Wiring Harness	15.00	Each
<sup>2</sup> 180422	LINX 5 Metre Wiring Harness, Use With (LX100)	57.00	Each

<sup>1</sup>Refer to PIB No.602 for detailed fitout information, app. update link and operation & installation guide link.

<sup>2</sup>Does not include relay, purchase relay separately based on your accessory amp requirements.

<sup>3</sup>(7450120) may assist boosting signal minimising dropout with LINX. Cannot be used with (819108) TPMS Integrated Display Standalone System.

<sup>4</sup>3G display battery no longer available. Component part for upgrade to 4G display (7450502SP) and 4G replacement battery (7450502BSP), not suitable for 3G display, are available at extra charge. Refer to Spare Parts price list.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.			
<b>Nitrocharger Plus</b> -During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Nitrocharger Plus</b> -During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>OME leaf springs</b> - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>BP-51</b> - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.			
<b>Nitrocharger Plus</b> -During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Nitrocharger Plus</b> -During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

#### DRAWER ACCESSORIES

(CABRUN) Cable Guide, Suits RF, RFH & RDRF Applications, 1000mm Adjustable Length 31.00 74.00 105.00

<sup>1</sup>When mounting a RF roller floor with adaptor it is recommended that the fridge be mounted on the passenger side of the vehicle to allow east-west airflow for the compressor.

<sup>2</sup>Ventilation holes should be opened/cut on the side floor kit to allow compressor ventilation, especially on larger fridges.

<sup>3</sup>RFFKADP is not recommended for use with the ARB Elements fridge due to insufficient ventilation with the RFFKADP adaptor only.

<sup>4</sup>Roller drawer table only suits RD drawers.

<sup>5</sup>Extra BEP500 Panel required for two RF fitout.

<sup>6</sup>Compatible with ARB Outback Solutions drawer systems and 4WD Interior drawer systems only.

<sup>7</sup>RFFKADP adaptors may need carpet removed to suit RFH drawer height. See instructions.

<sup>8</sup>12V Power outlet no longer accessible in trim panel.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Fitting should be performed by trained & licensed OME Fitters.			
<b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.			
<b>OME leaf springs</b> - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS<sup>1</sup> - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

- BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.
- MT64** - Big distances, heavy loads, extreme climates. A 4WD demands the most of any gear, quickly sorting out the pretenders. Most shocks aren't up to the task. In response, we've developed the ultimate all-round shock absorber. Designed, engineered and manufactured by ARB's specialised OME suspension engineers, the MT64 is an expertly constructed blend of the Nitrocharger's proven reliability and the durability of BP-51's premium features, making it the perfect all-rounder. ARB's Old Man Emu (OME) shocks thrive in extreme conditions all around the world. We know the challenges a vehicle's suspension faces, and 4WDing brings its own set of challenges. For a 4x4 owner, the dream is to have a set of shocks that will perform the same on the roads during the week, as it does on the tracks on the weekend.
- Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.
- OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.
- OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.
- GVM Upgrade** - Whether you're carrying tools of the trade or packing up the 4x4 for an extended trip, your vehicle can become dangerous and illegal if it exceeds the allocated gross vehicle mass (GVM). The GVM is the maximum a vehicle can weigh when fully loaded. Everything you place on or in your vehicle adds to the overall GVM – fuel, accessories, cargo (including passengers), the tray body for cab chassis models, and even the tow ball load applied by a boat or camper trailer.
- Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

<b>BP-51 -</b>	The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.		
<b>Nitrocharger Plus</b>	- During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.		
<b>OME coil springs</b>	- ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.		
<b>OME leaf springs</b>	- Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>OME leaf springs</b> - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.			
<b>Torsion bars</b> - Old Man Emu Torsion Bars dramatically improve your vehicle's ride and handling, both on road and off. Designed and set for optimum ride performance with increased spring rates to suit accessory fitment.			
<b>Greaseable shackles</b> - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS</b> - Refer to the latest OME Catalogue for a complete range of products and applications.			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

### OLD MAN EMU SUSPENSION PRODUCTS

#### **SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.**

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Torsion bars** - Old Man Emu Torsion Bars dramatically improve your vehicle's ride and handling, both on road and off. Designed and set for optimum ride performance with increased spring rates to suit accessory fitment.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

### ARB AIR LOCKER LOCKING DIFFERENTIALS & AIR COMPRESSORS

<sup>1</sup>For further information please visit Air Locker Application Chart on the ARB Website. [www.arb.com.au](http://www.arb.com.au)

<sup>2</sup>Some builds between 12/96 and 05/98 used an unidentified 3rd member and carrier with a different ring gear bolt pattern. A 3rd member with the same ratio may be swapped from earlier or later models for Air Locker installation.

<sup>3</sup>Refer to vehicle manufacturer's service manual to determine if Crown wheel bolts need to be replaced, not included in pricing shown.

Note: Oil and gaskets are included in the fitting charge. An extra charge will apply for non standard switches or switch positions, different compressor location etc. Some vehicles may require additional mechanical work.

### OLD MAN EMU SUSPENSION PRODUCTS

#### **SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.**

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Torsion bars** - Old Man Emu Torsion Bars dramatically improve your vehicle's ride and handling, both on road and off. Designed and set for optimum ride performance with increased spring rates to suit accessory fitment.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

**Torsion bars** - Old Man Emu Torsion Bars dramatically improve your vehicle's ride and handling, both on road and off. Designed and set for optimum ride performance with increased spring rates to suit accessory fitment.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b><u>SUSPENSION SYSTEMS</u> - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

<sup>4</sup>Refer to vehicle manufacturer's service manual to determine if Crown wheel bolts need to be replaced, not included in pricing shown.

<sup>5</sup>Cast Differential covers are designed to suit a wide range of vehicles globally. Care must be exercised when fitting. Some vehicles may require modifications to the differential cover and/or vehicle for correct installation and may incur an additional charge. Where cooling means have been employed on the cover being replaced alternative cooling means should be considered.

Note: Oil and gaskets are included in the fitting charge. An extra charge will apply for non standard switches or switch positions, different compressor location etc. Some vehicles may require additional mechanical work.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>BP-51 -</b>	The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.		
<b>Nitrocharger Plus -</b>	During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.		
<b>OME coil springs -</b>	ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.		
<b>OME leaf springs -</b>	Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.		
<b>GVM Upgrade -</b>	Whether you're carrying tools of the trade or packing up the 4x4 for an extended trip, your vehicle can become dangerous and illegal if it exceeds the allocated gross vehicle mass (GVM). The GVM is the maximum a vehicle can weigh when fully loaded. Everything you place on or in your vehicle adds to the overall GVM – fuel, accessories, cargo (including passengers), the tray body for cab chassis models, and even the tow ball load applied by a boat or camper trailer.		
<b>Greaseable shackles -</b>	Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

Contd

<sup>2</sup>Some builds between 12/96 and 05/98 used an unidentified 3rd member and carrier with a different ring gear bolt pattern. A 3rd member with the same ratio may be swapped from earlier or later models for Air Locker installation.

<sup>3</sup>Refer to vehicle manufacturer's service manual to determine if Crown wheel bolts need to be replaced, not included in pricing shown.

<sup>4</sup>Note: Oil and gaskets are included in the fitting charge. An extra charge will apply for non standard switches or switch positions, different compressor location etc. Some vehicles may require additional mechanical work.

### OLD MAN EMU SUSPENSION PRODUCTS

#### **SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.**

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Torsion bars** - Old Man Emu Torsion Bars dramatically improve your vehicle's ride and handling, both on road and off. Designed and set for optimum ride performance with increased spring rates to suit accessory fitment.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

Note: Oil and gaskets are included in the fitting charge. An extra charge will apply for non standard switches or switch positions, different compressor location etc. Some vehicles may require additional mechanical work.			
<sup>1</sup> For further information please visit Air Locker Application Chart on the ARB Website. <a href="http://www.arb.com.au">www.arb.com.au</a>			
<sup>2</sup> Some builds between 12/96 and 05/98 used an unidentified 3rd member and carrier with a different ring gear bolt pattern. A 3rd member with the same ratio may be swapped from earlier or later models for Air Locker installation.			
<sup>3</sup> Refer to vehicle manufacturer's service manual to determine if Crown wheel bolts need to be replaced, not included in pricing shown.			
<sup>4</sup> When fitting (RD214) or (RD213) rear locker to an M-UX vehicle with a pre-existing (TAD105) Frontier diesel fuel tank, lowering of the tank is required to allow access to fit the rear locker.

<sup>1</sup>When mounting a RF roller floor with adaptor it is recommended that the fridge be mounted on the passenger side of the vehicle to allow east-west airflow for the compressor.

<sup>2</sup>Ventilation holes should be opened/cut on the side floor kit to allow compressor ventilation, especially on larger fridges.

<sup>3</sup>RFFKADP is not recommended for use with the ARB Elements fridge due to insufficient ventilation with the RFFKADP adaptor only.

<sup>4</sup>Roller drawer table only suits RD drawers.

<sup>5</sup>Extra BEP500 Panel required for two RF fitout.

<sup>6</sup>If fitting Cargo Barrier with (RF945) Roller Floor, Barrier Extension Panel (BEP500RH/LH) is required.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

Contd

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OLD MAN EMU SUSPENSION PRODUCTS**

**SUSPENSION SYSTEMS<sup>1</sup>** - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

<sup>1</sup>At time of publication fitment to WL Grand Cherokee is unconfirmed.

<sup>6</sup>Cast differential covers are designed to suit a wide range of vehicles globally. Care must be exercised when fitting. Some vehicles may require modifications to the differential cover and/or vehicle for correct installation and may incur an additional charge. Where cooling means have been employed on the cover being replaced alternative cooling means should be considered.

<sup>7</sup>It is **strongly** recommended to visit Air Locker Application Chart on the ARB Website. [www.arb.com.au](http://www.arb.com.au) for further information.

<sup>8</sup>A large range of Air Lockers also available for rear locker depending on Model. Please refer to the Air Locker Application Chart on the ARB website, [www.arb.com.au](http://www.arb.com.au).

<sup>9</sup>Quadra-drive traction control vehicles require non-Quadra-drive axle shaft replacements for Air Locker installation.

<sup>10</sup>Newer OEM Dana 35, Dana 44 & Chrysler 8.25" ring gears may have 3/8", 7/16" or 1/2" ring gear bolts. Air Locker flange holes must be drilled or reamed larger to suit 7/16" or 1/2" bolts.

##### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51 - Off Rd. Use** The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

<sup>1</sup>M200 rear axle can be identified by the oil drain plug in the bottom center of axle housing. The M220 rear axle can be identified by the oil drain plug in the left hand side of the housing.

<sup>2</sup>(RD245) must NOT be used in JL Rubicons. It must only be used in JL Sport/Sahara vehicles equipped with M220 differential.

<sup>3</sup>Axle upgrade required. (RD246) requires upgrade to aftermarket 35 spline axle shafts (sold seperately).

<sup>4</sup>To use (RD246) in the front of JL Rubicon, aftermarket electronics (not supplied by ARB) are required to modify the ECU to clear error codes.

<sup>5</sup>(RD246) cannot be used in rear only applications. It can be used in front only, or front and rear together, however both of these applications will require aftermarket electronics (not supplied by ARB) to modify the ECU to clear error codes.

<sup>6</sup>It is **strongly** recommended to visit Air Locker Application Chart on the ARB Website. [www.arb.com.au](http://www.arb.com.au) for further information and for modification requirements where required.

Note: Oil and gaskets are included in the fitting charge. An extra charge will apply for non standard switches or switch positions, different compressor location etc. Some vehicles may require additional mechanical work.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51 - Off Rd. Use** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

### OLD MAN EMU SUSPENSION PRODUCTS

#### **SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.**

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51 - 110 Long Travel** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

### ARB AIR LOCKER LOCKING DIFFERENTIALS, AIR COMPRESSORS & COVERS

Note: Oil and gaskets are included in the fitting charge. An extra charge will apply for non standard switches or switch positions, different compressor location etc. Some vehicles may require additional mechanical work.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**SERIES 2 - All Coil Suspension & SERIES 1 To 1998**

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

<b>Steering Damper</b> - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

<sup>9</sup> Fitment of larger diameter tyres and/or aftermarket suspension may affect sensor operation.			
<sup>10</sup> Compatible with ARB Recovery Points (2848030) & (2848040).			
<sup>11</sup> Additional fitting kits and relocation kits are required see Winch Installation Kits located in the Warn & Magnum/Bushranger/Smittybilt Electric Winches section below.			
<sup>12</sup> Refer to winch fitting kit instruction for further information regarding mount hole or bracket suitability. Also Note that not all winches available on the market will have corresponding control box mount holes pre-drilled.			
<sup>13</sup> If fitting bullbar and not upgrading suspension it is recommended that a wheel alignment (WHAL) or (WHALIFS) is performed.			
<sup>13</sup> This bar can only accommodate small Solis, no other lights are able to be fitted.

### **OLD MAN EMU SUSPENSION PRODUCTS**

#### **SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.**

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51 -** The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**Nitrocharger Plus -** During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs -** ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs -** Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**GVM Upgrade -** Whether you're carrying tools of the trade or packing up the 4x4 for an extended trip, your vehicle can become dangerous and illegal if it exceeds the allocated gross vehicle mass (GVM). The GVM is the maximum a vehicle can weigh when fully loaded. Everything you place on or in your vehicle adds to the overall GVM – fuel, accessories, cargo (including passengers), the tray body for cab chassis models, and even the tow ball load applied by a boat or camper trailer.

**Greaseable shackles -** Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			

## BT-50 04/2018 TO 2020 & BT-50 2011 TO 03/2018

	Price	Fitting	Total Fitted
--	-------	---------	--------------

### OLD MAN EMU SUSPENSION PRODUCTS

- BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.
- Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.
- OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.
- OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.
- Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>Torsion bars</b> - Old Man Emu Torsion Bars dramatically improve your vehicle's ride and handling, both on road and off. Designed and set for optimum ride performance with increased spring rates to suit accessory fitment.			
<b>OME leaf springs</b> - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.			
<b>Greaseable shackles</b> - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS</b> - Refer to the latest OME Catalogue for a complete range of products and applications.			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS</b> - Refer to the latest OME Catalogue for a complete range of products and applications.			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**Torsion bars** - Old Man Emu Torsion Bars dramatically improve your vehicle's ride and handling, both on road and off. Designed and set for optimum ride performance with increased spring rates to suit accessory fitment.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

Note: Oil and gaskets are included in the fitting charge. An extra charge will apply for non standard switches or switch positions, different compressor location etc. Some vehicles may require additional mechanical work.

<sup>1</sup>For further information please visit Air Locker Application Chart on the ARB Website. [www.arb.com.au](http://www.arb.com.au)

<sup>2</sup>Depending on vehicle specification (RD154) Lockers may be used. We advise a physical inspection of differential (spline count) to ensure correct locker fitment.

<sup>3</sup>Some 28 spline axles have the smaller 7.25" RG and will not accept (RD110).

<sup>4</sup>Refer to vehicle manufacturer's service manual to determine if Crown wheel bolts need to be replaced, not included in pricing shown.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>Contd</b>			
<p><b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.</p> <p><b>OME leaf springs</b> - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.</p> <p><b>Greaseable shackles</b> - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.</p>

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

### OLD MAN EMU SUSPENSION PRODUCTS

#### **SUSPENSION SYSTEMS** - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Torsion bars** - Old Man Emu Torsion Bars dramatically improve your vehicle's ride and handling, both on road and off. Designed and set for optimum ride performance with increased spring rates to suit accessory fitment.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

**BP-51 -** manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.  
**(cont.)**

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>NITROCHARGER SPORT SHOCKS</b> - Set Of 4 - GQ Patrol CC Coil Spring & Ute	804.00	222.00	1026.00

**SUSPENSION SYSTEMS** - Refer to the latest OME Catalogue for a complete range of products and applications. Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

### OLD MAN EMU SUSPENSION PRODUCTS

#### STEERING STABILISER

(OMESD22) 1967 To 1988 All Models	222.00	74.00	296.00
-----------------------------------	--------	-------	--------

<sup>1</sup>To suit Old Man Emu springs. Bush kits for OE springs also available.

<sup>2</sup>No fitting charge applies when fitted with suspension system.

#### **SUSPENSION SYSTEMS** - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>BP-51 -</b>	The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.		
<b>Nitrocharger Plus -</b>	During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.		
<b>OME coil springs -</b>	ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.		
<b>OME leaf springs -</b>	Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.		
<b>Greaseable shackles -</b>	Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>Nitrocharger Plus Pathfinder To 96</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>Torsion bars - Navara -</b> Old Man Emu Torsion Bars dramatically improve your vehicle's ride and handling, both on road and off. Designed and set for optimum ride performance with increased spring rates to suit accessory fitment.			
<b>OME coil springs Pathfinder</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.			
<b>OME leaf springs Navara</b> - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.			
<b>Greaseable shackles Navara</b> - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>OME coil springs</b> - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>BP-51 -</b>	The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.		
<b>MT64 -</b>	Big distances, heavy loads, extreme climates. A 4WD demands the most of any gear, quickly sorting out the pretenders. Most shocks aren't up to the task. In response, we've developed the ultimate all-round shock absorber. Designed, engineered and manufactured by ARB's specialised OME suspension engineers, the MT64 is an expertly constructed blend of the Nitrocharger's proven reliability and the durability of BP-51's premium features, making it the perfect all-rounder. ARB's Old Man Emu (OME) shocks thrive in extreme conditions all around the world. We know the challenges a vehicle's suspension faces, and 4WDing brings its own set of challenges. For a 4x4 owner, the dream is to have a set of shocks that will perform the same on the roads during the week, as it does on the tracks on the weekend.		
<b>Nitrocharger Plus -</b>	During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.		
<b>OME coil springs -</b>	ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

#### **SUSPENSION SYSTEMS** - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

**SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.**

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

#### EXCLUDES ROGUE & GR SPORT VARIANTS

**BP-51 -** The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**MT64 -** Big distances, heavy loads, extreme climates. A 4WD demands the most of any gear, quickly sorting out the pretenders. Most shocks aren't up to the task. In response, we've developed the ultimate all-round shock absorber. Designed, engineered and manufactured by ARB's specialised OME suspension engineers, the MT64 is an expertly constructed blend of the Nitrocharger's proven reliability and the durability of BP-51's premium features, making it the perfect all-rounder. ARB's Old Man Emu (OME) shocks thrive in extreme conditions all around the world. We know the challenges a vehicle's suspension faces, and 4WDing brings its own set of challenges. For a 4x4 owner, the dream is to have a set of shocks that will perform the same on the roads during the week, as it does on the tracks on the weekend.

**Nitrocharger Plus -** During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME Parabolic springs and airbags** - Parabolic Leaf Spring and Air Bag Kit gives you the flexibility to cater for varying loads.

Therefore, whether it is tools during the week or a rooftop tent on the weekend; ARB's Parabolic Leaf Springs and Air Bag Kit system has you covered and provides the new standard in comfort and weight carrying adjustability.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**GVM Upgrade** - Whether you're carrying tools of the trade or packing up the 4x4 for an extended trip, your vehicle can become dangerous and illegal if it exceeds the allocated gross vehicle mass (GVM). The GVM is the maximum a vehicle can weigh when fully loaded. Everything you place on or in your vehicle adds to the overall GVM – fuel, accessories, cargo (including passengers), the tray body for cab chassis models, and even the tow ball load applied by a boat or camper trailer.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

<sup>2</sup>Only half of optional Side Floor Kit is used.

<sup>3</sup>Must be stacked on a fix top (RD1355) module.

<sup>4</sup>Check for clearance with non ARB canopy.

<sup>5</sup>Stacker draw will not fit with ARB Ascent canopy.

<sup>6</sup>Incompatible with Roller Floor Roller Drawer (RDRF) applications.

<sup>7</sup>When mounting a RF roller floor with adaptor it is recommended that the fridge be mounted on the passenger side of the vehicle to allow east-west airflow for the compressor.

<sup>8</sup>Ventilation holes should be opened/cut on the side floor kit to allow compressor ventilation.

<sup>9</sup>RFFKADP is not recommended for use with the ARB Elements fridge due to insufficient ventilation with the RFFKADP adaptor only.

<sup>10</sup>RFFKADP adaptors may need carpet removed to suit RFH drawer height. See instructions.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>BP-51 -</b>	The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.		
<b>MT64 -</b>	Big distances, heavy loads, extreme climates. A 4WD demands the most of any gear, quickly sorting out the pretenders. Most shocks aren't up to the task. In response, we've developed the ultimate all-round shock absorber. Designed, engineered and manufactured by ARB's specialised OME suspension engineers, the MT64 is an expertly constructed blend of the Nitrocharger's proven reliability and the durability of BP-51's premium features, making it the perfect all-rounder. ARB's Old Man Emu (OME) shocks thrive in extreme conditions all around the world. We know the challenges a vehicle's suspension faces, and 4WDing brings its own set of challenges. For a 4x4 owner, the dream is to have a set of shocks that will perform the same on the roads during the week, as it does on the tracks on the weekend.		
<b>Nitrocharger Plus -</b>	During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.		
<b>OME coil springs -</b>	ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.		
<b>OME Parabolic springs and airbags -</b>	Parabolic Leaf Spring and Air Bag Kit gives you the flexibility to cater for varying loads. Therefore, whether it is tools during the week or a rooftop tent on the weekend; ARB's Parabolic Leaf Springs and Air Bag Kit system has you covered and provides the new standard in comfort and weight carrying adjustability.		
<b>OME leaf springs -</b>	Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.		
<b>Greaseable shackles -</b>	Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51 -** The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**Nitrocharger Plus -** During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs -** ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs -** Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles -** Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

### OLD MAN EMU SUSPENSION PRODUCTS

#### **SUSPENSION SYSTEMS** - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

### ARB AIR LOCKER LOCKING DIFFERENTIALS & AIR COMPRESSORS

Note: Oil and gaskets are included in the fitting charge. An extra charge will apply for non standard switches or switch positions, different compressor location etc. Some vehicles may require additional mechanical work.

<sup>3</sup> Must be stacked on a fix top (RD1355) module.			
<sup>4</sup> Check for clearance with non ARB canopy.			
<sup>5</sup> Incompatible with Roller Floor Roller Drawer (RDRF) applications.			
<sup>6</sup> When mounting a RF roller floor with adaptor it is recommended that the fridge be mounted on the passenger side of the vehicle to allow east-west airflow for the compressor.			
<sup>7</sup> Ventilation holes should be opened/cut on the side floor kit to allow compressor ventilation.			
<sup>8</sup> RFFKADP is not recommended for use with the ARB Elements fridge due to insufficient ventilation with the RFFKADP adaptor only.			
<sup>9</sup> Compatible with ARB Outback Solutions drawer systems and 4WD Interior drawer systems only.			
<sup>10</sup> RFFKADP adaptors may need carpet removed to suit RFH drawer height. See instructions.			
*Approx. 195mm between front of module and front of tub.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>Contd</b>			
<b>Torsion bars</b> - Old Man Emu Torsion Bars dramatically improve your vehicle's ride and handling, both on road and off. Designed and set for optimum ride performance with increased spring rates to suit accessory fitment.			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>OME leaf springs</b> - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.			
<b>Greaseable shackles</b> - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.			
<b>Steering Damper</b> - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>Contd</b>			
<p><b>Greaseable shackles</b> - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.</p> <p><b>Steering Damper</b> - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.</p>

### OLD MAN EMU SUSPENSION PRODUCTS

#### **SUSPENSION SYSTEMS** - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**MT64** - Big distances, heavy loads, extreme climates. A 4WD demands the most of any gear, quickly sorting out the pretenders. Most shocks aren't up to the task. In response, we've developed the ultimate all-round shock absorber. Designed, engineered and manufactured by ARB's specialised OME suspension engineers, the MT64 is an expertly constructed blend of the Nitrocharger's proven reliability and the durability of BP-51's premium features, making it the perfect all-rounder. ARB's Old Man Emu (OME) shocks thrive in extreme conditions all around the world. We know the challenges a vehicle's suspension faces, and 4WDing brings its own set of challenges. For a 4x4 owner, the dream is to have a set of shocks that will perform the same on the roads during the week, as it does on the tracks on the weekend.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

**GVM Upgrade** - Whether you're carrying tools of the trade or packing up the 4x4 for an extended trip, your vehicle can become dangerous and illegal if it exceeds the allocated gross vehicle mass (GVM). The GVM is the maximum a vehicle can weigh when fully loaded. Everything you place on or in your vehicle adds to the overall GVM – fuel, accessories, cargo (including passengers), the tray body for cab chassis models, and even the tow ball load applied by a boat or camper trailer.

Note: This does not cover the cost or install times for compressors, compressor patch loom, and Air Bags. All braided Air-Lines and high pressure air fittings must be purchased additionally. For Operational, Installation and Fitment Guides please see [linx.arb.com.au/manuals](http://linx.arb.com.au/manuals)

<sup>1</sup>If fitting LINX Air Susp. in combination with Pressure Control then a 2 x (7450107) (PRV's are required).

<sup>2</sup>Ensure power wire chosen operates between 9 volts and 16 volts and is mounted in a position that has the clearest and most direct line of sight for each sensor in use. To avoid interruption to RF signal, avoid interference with the following material types: steel, metals, vehicle seats, cargo barriers, wheel rims, timber, RF/CB devices, drawer systems, metallic tint, control units, electrical devices. Mounting in a higher position such as inside the plastic trim that surrounds the rear boot window glass is recommended for optimum performance.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS</b> - Refer to the latest OME Catalogue for a complete range of products and applications.			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>BP-51</b> -	The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.		
<b>MT64</b> -	Big distances, heavy loads, extreme climates. A 4WD demands the most of any gear, quickly sorting out the pretenders. Most shocks aren't up to the task. In response, we've developed the ultimate all-round shock absorber. Designed, engineered and manufactured by ARB's specialised OME suspension engineers, the MT64 is an expertly constructed blend of the Nitrocharger's proven reliability and the durability of BP-51's premium features, making it the perfect all-rounder. ARB's Old Man Emu (OME) shocks thrive in extreme conditions all around the world. We know the challenges a vehicle's suspension faces, and 4WDing brings its own set of challenges. For a 4x4 owner, the dream is to have a set of shocks that will perform the same on the roads during the week, as it does on the tracks on the weekend.		
<b>Nitrocharger Plus</b> -	During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.		
<b>OME coil springs</b> -	ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

<sup>3</sup> Must be stacked on a fixed top module.			
<sup>4</sup> If fitting Cargo Barrier with (RF1045) Roller Floor, Barrier Extension Panel (BEP530RH/LH) is required.			
<sup>5</sup> Incompatible with Roller Floor Roller Drawer (RDRF) applications.			
<sup>6</sup> When mounting a RF roller floor with adaptor it is recommended that the fridge be mounted on the passenger side of the vehicle to allow east-west airflow for the compressor.			
<sup>7</sup> Ventilation holes should be opened/cut on the side floor kit to allow compressor ventilation.			
<sup>8</sup> RFFKADP is not recommended for use with the ARB Elements fridge due to insufficient ventilation with the RFFKADP adaptor only.			
<sup>9</sup> Compatible with ARB Outback Solutions drawer systems and 4WD Interior drawer systems only.			
<sup>10</sup> RFFKADP adaptors may need carpet removed to suit RFH drawer height. See instructions.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b><u>SUSPENSION SYSTEMS</u></b> - Refer to the latest OME Catalogue for a complete range of products and applications.			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>BP-51</b> -	The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.		
<b>MT64</b> -	Big distances, heavy loads, extreme climates. A 4WD demands the most of any gear, quickly sorting out the pretenders. Most shocks aren't up to the task. In response, we've developed the ultimate all-round shock absorber. Designed, engineered and manufactured by ARB's specialised OME suspension engineers, the MT64 is an expertly constructed blend of the Nitrocharger's proven reliability and the durability of BP-51's premium features, making it the perfect all-rounder. ARB's Old Man Emu (OME) shocks thrive in extreme conditions all around the world. We know the challenges a vehicle's suspension faces, and 4WDing brings its own set of challenges. For a 4x4 owner, the dream is to have a set of shocks that will perform the same on the roads during the week, as it does on the tracks on the weekend.		
<b>Nitrocharger Plus</b> -	During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.		
<b>OME coil springs</b> -	ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.		
<b>ARB AIR LOCKER LOCKING DIFFERENTIALS &amp; AIR COMPRESSORS</b>			
Note: Oil and gaskets are included in the fitting charge. An extra charge will apply for non standard switches or switch positions, different compressor location etc. Some vehicles may require additional mechanical work and KDSS equipped Models will incur additional installation costs.

<sup>1</sup> Optional Side Floor Kit is available.			
<sup>2</sup> Only half of optional Side Floor Kit is used.			
<sup>3</sup> Must be stacked on a fixed top module.			
<sup>4</sup> If fitting Cargo Barrier with (RF1045) Roller Floor, Barrier Extension Panel (BEP530RH/LH) is required.			
<sup>5</sup> Incompatible with Roller Floor Roller Drawer (RDRF) applications.			
<sup>6</sup> When mounting a RF roller floor with adaptor it is recommended that the fridge be mounted on the passenger side of the vehicle to allow east-west airflow for the compressor.			
<sup>7</sup> Ventilation holes should be opened/cut on the side floor kit to allow compressor ventilation.			
<sup>8</sup> RFFKADP is not recommended for use with the ARB Elements fridge due to insufficient ventilation with the RFFKADP adaptor only.			
<sup>9</sup> Compatible with ARB Outback Solutions drawer systems and 4WD Interior drawer systems only.			
<sup>10</sup> RFFKADP adaptors may need carpet removed to suit RFH drawer height. See instructions.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS</b> - Refer to the latest OME Catalogue for a complete range of products and applications.			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Torsion bars</b> -	Old Man Emu Torsion Bars dramatically improve your vehicle's ride and handling, both on road and off. Designed and set for optimum ride performance with increased spring rates to suit accessory fitment.		
<b>Nitrocharger Plus</b> -	During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.		
<b>BP-51</b> -	The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is

### OLD MAN EMU SUSPENSION PRODUCTS

Contd

**BP-51 - (cont.)** manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.</b>			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>BP-51</b> -	The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

### OLD MAN EMU SUSPENSION PRODUCTS

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

### ARB AIR LOCKER LOCKING DIFFERENTIALS & AIR COMPRESSORS

<sup>2,3</sup> (RD132) Front Locker - 10 Bolt, Full Floating, 30 Spline, Ratio All	1286.00	666.00	1952.00

<sup>1</sup> Optional Side Floor Kit is available.			
<sup>2</sup> Only half of optional Side Floor Kit is used.			
<sup>3</sup> Must be stacked on (RD1045) fix top module.			
<sup>4</sup> If fitting Cargo Barrier with (RF1045) Roller Floor, Barrier Extension Panel (BEP530RH/LH) is required.			
<sup>5</sup> Incompatible with Roller Floor Roller Drawer (RDRF) applications.			
<sup>6</sup> When mounting a RF roller floor with adaptor it is recommended that the fridge be mounted on the passenger side of the vehicle to allow east-west airflow for the compressor.			
<sup>7</sup> Ventilation holes should be opened/cut on the side floor kit to allow compressor ventilation.			
<sup>8</sup> RFFKADP is not recommended for use with the ARB Elements fridge due to insufficient ventilation with the RFFKADP adaptor only.			
<sup>9</sup> Compatible with ARB Outback Solutions drawer systems and 4WD Interior drawer systems only.			
<sup>10</sup> RFFKADP adaptors may need carpet removed to suit RFH drawer height. See instructions.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

- BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.
- MT64** - Big distances, heavy loads, extreme climates. A 4WD demands the most of any gear, quickly sorting out the pretenders. Most shocks aren't up to the task. In response, we've developed the ultimate all-round shock absorber. Designed, engineered and manufactured by ARB's specialised OME suspension engineers, the MT64 is an expertly constructed blend of the Nitrocharger's proven reliability and the durability of BP-51's premium features, making it the perfect all-rounder. ARB's Old Man Emu (OME) shocks thrive in extreme conditions all around the world. We know the challenges a vehicle's suspension faces, and 4WDing brings its own set of challenges. For a 4x4 owner, the dream is to have a set of shocks that will perform the same on the roads during the week, as it does on the tracks on the weekend.
- Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.
- OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.
- OME Parabolic springs and airbags** - Parabolic Leaf Spring and Air Bag Kit gives you the flexibility to cater for varying loads. Therefore, whether it is tools during the week or a rooftop tent on the weekend; ARB's Parabolic Leaf Springs and Air Bag Kit system has you covered and provides the new standard in comfort and weight carrying adjustability.
- OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.
- GVM Upgrade** - Whether you're carrying tools of the trade or packing up the 4x4 for an extended trip, your vehicle can become dangerous and illegal if it exceeds the allocated gross vehicle mass (GVM). The GVM is the maximum a vehicle can weigh when fully loaded. Everything you place on or in your vehicle adds to the overall GVM – fuel, accessories, cargo (including passengers), the tray body for cab chassis models, and even the tow ball load applied by a boat or camper trailer.
- Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.
- Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

<sup>1</sup> Optional Side Floor Kit is available.			
<sup>2</sup> Only half of optional Side Floor Kit is used.			
<sup>3</sup> Must be stacked on a fix top module.			
<sup>4</sup> If fitting Cargo Barrier with (RF945) or (RF1355) Roller Floor, Barrier Extension Panel (BEP500RH/LH) is required.			
<sup>5</sup> Incompatible with Roller Floor Roller Drawer (RDRF) applications.			
<sup>6</sup> When mounting a RF roller floor with adaptor it is recommended that the fridge be mounted on the passenger side of the vehicle to allow east-west airflow for the compressor.			
<sup>7</sup> Ventilation holes should be opened/cut on the side floor kit to allow compressor ventilation.			
<sup>8</sup> RFFKADP is not recommended for use with the ARB Elements fridge due to insufficient ventilation with the RFFKADP adaptor only.			
<sup>9</sup> Compatible with ARB Outback Solutions drawer systems and 4WD Interior drawer systems only.			
<sup>10</sup> RFFKADP adaptors may need carpet removed to suit RFH drawer height. See instructions.

<sup>1</sup>Fitting is per set. Fitting electric mirror to factory non electric mirrored vehicle requires (SP-EK), included with CV-TL-70S-KEB/C/KIEB/C, and additional hard wiring by a registered auto-electrician at extra charge. Hard wiring of additional electrical options, where available, by a registered electrician will be required.

<sup>2</sup>Clearview towing mirrors might negate the use of Quarter Port Window on the 78 Series Models that have these.

<sup>3</sup>Models without strap mirror, 70 Series Troop Carrier and Wagon, may require additional drilling into the vehicle's door for fitment of Clearview mirrors. Should this procedure be unacceptable Clearview mirrors should not be optioned.

<sup>4</sup>2016 To 2023 LandCruisers will accept the towing mirror base however fitment may necessitate additional drilling.

<sup>5</sup>On indicator option, hard wiring of indicators by a registered electrician will be required.

<sup>6,7</sup>(CVNG-MHC-RAW, CC2) Optional Raw Mirror Covers For Colour Coding, Order With New Product 265.00

<sup>7</sup>Colour coding of pre-existing product requires removal, reassembly and refit therefore additional hourly fitting time will be incurred.

### OLD MAN EMU SUSPENSION PRODUCTS

**SUSPENSION SYSTEMS** - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**MT64** - Big distances, heavy loads, extreme climates. A 4WD demands the most of any gear, quickly sorting out the pretenders. Most shocks aren't up to the task. In response, we've developed the ultimate all-round shock absorber. Designed, engineered and manufactured by ARB's specialised OME suspension engineers, the MT64 is an expertly constructed blend of the Nitrocharger's proven reliability and the durability of BP-51's premium features, making it the perfect all-rounder. ARB's Old Man Emu (OME) shocks thrive in extreme conditions all around the world. We know the challenges a vehicle's suspension faces, and 4WDing brings its own set of challenges. For a 4x4 owner, the dream is to have a set of shocks that will perform the same on the roads during the week, as it does on the tracks on the weekend.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME Parabolic springs and airbags** - Parabolic Leaf Spring and Air Bag Kit gives you the flexibility to cater for varying loads. Therefore, whether it is tools during the week or a rooftop tent on the weekend; ARB's Parabolic Leaf Springs and Air Bag Kit system has you covered and provides the new standard in comfort and weight carrying adjustability.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**GVM Upgrade** - Whether you're carrying tools of the trade or packing up the 4x4 for an extended trip, your vehicle can become dangerous and illegal if it exceeds the allocated gross vehicle mass (GVM). The GVM is the maximum a vehicle can weigh when fully loaded. Everything you place on or in your vehicle adds to the overall GVM – fuel, accessories, cargo (including passengers), the tray body for cab chassis models, and even the tow ball load applied by a boat or camper trailer.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

**Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

<sup>1</sup>Fitting is per set. Fitting electric mirror to factory non electric mirrored vehicle requires (SP-EK), included with CV-TL-70S-KEB/C/KIEB/C, and additional hard wiring by a registered auto-electrician at extra charge. Hard wiring of additional electrical options, where available, by a registered electrician will be required.

<sup>2</sup>Clearview towing mirrors might negate the use of Quarter Port Window on the 78 Series Models that have these.

<sup>3</sup>Models without strap mirror, 70 Series Troop Carrier and Wagon, may require additional drilling into the vehicle's door for fitment of Clearview mirrors. Should this procedure be unacceptable Clearview mirrors should not be optioned.

<sup>4</sup>On indicator option, hard wiring of indicators by a registered electrician will be required.

<sup>5,6</sup>(CVNG-MHC-RAW, CC2) Optional Raw Mirror Covers For Colour Coding, Order With New Product 265.00

<sup>6</sup>Colour coding of pre-existing product requires removal, reassembly and refit therefore additional hourly fitting time will be incurred.

## OLD MAN EMU SUSPENSION PRODUCTS

### **SUSPENSION SYSTEMS** - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

**Steering Damper** - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS</b> - Refer to the latest OME Catalogue for a complete range of products and applications.			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>OME leaf springs</b> - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.			
<b>Nitrocharger Plus</b> - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.			
<b>Greaseable shackles</b> - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.			
<b>Steering Damper</b> - As another integral component of the Old Man Emu 4WD suspension range, steering dampers are designed to reduce the effect of wheel vibration and improve the feel, handling and control of the vehicle. OME Steering dampers also work to combat the aggressive rotation of the steering wheel over rough roads, without affecting steering wheel return. This will give you a smoother ride by reducing the side-to-side motion, which will improve longevity steering system.			
<b>ARB AIR LOCKER LOCKING DIFFERENTIALS &amp; AIR COMPRESSORS</b>			
Note: Oil and gaskets are included in the fitting charge. An extra charge will apply for non standard switches or switch positions, different compressor location etc. Some vehicles may require additional mechanical work.

### NOTES

<sup>9</sup>In addition to the lighting options listed in the ARB and IPF sections below, other options include ARB Intensity (AR40S) models with LED head lights requires (3500810) wiring harness/(AR40CV2) models with LED head lights requires (3500811) wiring harness<sup>7</sup>. Bushranger Night Hawk NHP180S, NHP-180S 180mm round/NHP180F 48W LED flood beam/NHS055-NHS205 5.5 inch to 20.5 inch light bars, IPF800/900 standard & HID series/801/901 Xtreme Sport series/900 Xtreme LED sports/868/968 lights.

<sup>10</sup>Where Toyota Safety Sense+ is present it is **important** to note that purchasers installing items in front of the Toyota badge risk interference with the Toyota Safety Sense+ radar when items are mounted higher than 130mm over the accessory bracket. This risk will also apply to the installation of lights on the accessory bracket.

<sup>11</sup>Driving light function can be installed on all variants with additional wiring.<sup>5,6</sup>

<sup>12</sup>Suits Warn Zeon<sup>14</sup> 8/8-S/10/10-S/Platinum 10/10-S, Magnum 10lb, Warn M8000/XD9000/XP9.5/XDC9.5, Bushranger SEAL9.5TH/Revo 10-W/10-S/COVERT 10K W/S, Smittybilt X20 10lb winches.<sup>8,10,13,15,16</sup>

<sup>13</sup>(Winch bar only) Where winch control box is fitted to the Driving Light Mount Bracket, the variety of light choices will be restricted and will not facilitate the fitment of any light bar options.

<sup>14</sup>Additional fitting kits and relocation kits are required see Winch Installation Kits located in the Warn & Magnum/Bushranger Winches section below.

<sup>15</sup>Accessory bracket supplied mounts to the bar in front of the grille where winch control box can be fitted on the bracket between spotlights. Installation of Smittybilt winch requires additional holes in the accessory bracket to facilitate the control box.

<sup>16</sup>Winches with synthetic rope may require (3500600) Hawse Fairlead Spacer Kit or alternative Hawse due to Hawse design. See Winch Installation Kits located in the Warn & Magnum/Bushranger Electric Winches section below.

<sup>17</sup>It is recommended that only Black Antennas and Flag Mounts be used on vehicles with LDA present.

<b>OLD MAN EMU SUSPENSION PRODUCTS</b>			
<b>SUSPENSION SYSTEMS</b> - Refer to the latest OME Catalogue for a complete range of products and applications.			
Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.			
<b>Excludes Kakadu Models</b>			
<b>BP-51</b> -	The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.		
<b>MT64</b> -	Big distances, heavy loads, extreme climates. A 4WD demands the most of any gear, quickly sorting out the pretenders. Most shocks aren't up to the task. In response, we've developed the ultimate all-round shock absorber. Designed, engineered and manufactured by ARB's specialised OME suspension engineers, the MT64 is an expertly constructed blend of the Nitrocharger's proven reliability and the durability of BP-51's premium features, making it the perfect all-rounder. ARB's Old Man Emu (OME) shocks thrive in extreme conditions all around the world. We know the challenges a vehicle's suspension faces, and 4WDing brings its own set of challenges. For a 4x4 owner, the dream is to have a set of shocks that will perform the same on the roads during the week, as it does on the tracks on the weekend.

**OLD MAN EMU SUSPENSION PRODUCTS** **Contd**

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

<sup>4</sup> (PR097SFK) is highly recommended to be used when installing (RD945) or (RDRF945) Roller Drawer modules into GXL, VX and Kakadu Models (not 5 seat with 7 seat upgrade option).			
<sup>5</sup> Not suitable for vehicles 5 seat with 7 seat upgrade option.			
<sup>6</sup> (PR09IK) required with ALL seven seat versions of the vehicle and with both drawer and roller floor modules.			
<sup>7</sup> If fitting Cargo Barrier with (RF945), Barrier Extension Panel (BEP500LH/RH) is required.			
<sup>8</sup> 60L and 78L ARB Fridges are incompatible with cargo barrier installation.			
<sup>9</sup> Incompatible with Roller Floor Roller Drawer (RDRF) applications.			
<sup>10</sup> When mounting a RF roller floor with adaptor it is recommended that the fridge be mounted on the passenger side of the vehicle to allow east-west airflow for the compressor.			
<sup>11</sup> Ventilation holes should be opened/cut on the side floor kit to allow compressor ventilation.			
<sup>12</sup> RFFKADP is not recommended for use with the ARB Elements fridge due to insufficient ventilation with the RFFKADP adaptor only.			
<sup>13</sup> Compatible with ARB Outback Solutions drawer systems and 4WD Interior drawer systems only.

<sup>2</sup> (W90287) Wireless Remote Plug & Play, Required <sup>3</sup> For Winch Fitment - VX, Kakadu, ZR Models	467.00		
<sup>3</sup> <b>Important Note:</b> Due to the unique inboard positioning of the low beam headlamps on this vehicle, on VX, ZR and Kakadu Models with HID (Xenon) headlamps some minor shadowing can be expected from the bull bar and other accessories. This does not affect the headlight performance or compliance with ADRs. ARB recommends fitting the Sahara style bar to VX, ZR and Kakadu Models. ZR and Kakadu Models can also have an optional centre grille located camera. Vision from this camera will unavoidably be obstructed in some cases where bars and accessories are installed. The radar anti collision system option in Kakadu and ZR is also located in the grille badge. Structures forward of this device may affect the operation of this device.			
<sup>4</sup> Winches with synthetic rope may require (3500600) Hawse Fairlead Spacer Kit or alternative Hawse due to Hawse design. See Winch Installation Kits located in the Warn & Magnum/Bushranger Electric Winches section below.

### OLD MAN EMU SUSPENSION PRODUCTS

#### SUSPENSION SYSTEMS - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

#### Excludes Kakadu Models

**BP-51 -** The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**MT64 -** Big distances, heavy loads, extreme climates. A 4WD demands the most of any gear, quickly sorting out the pretenders. Most shocks aren't up to the task. In response, we've developed the ultimate all-round shock absorber. Designed, engineered and manufactured by ARB's specialised OME suspension engineers, the MT64 is an expertly constructed blend of the Nitrocharger's proven reliability and the durability of BP-51's premium features, making it the perfect all-rounder. ARB's Old Man Emu (OME) shocks thrive in extreme conditions all around the world. We know the challenges a vehicle's suspension faces, and 4WDing brings its own set of challenges. For a 4x4 owner, the dream is to have a set of shocks that will perform the same on the roads during the week, as it does on the tracks on the weekend.

**Nitrocharger Plus -** During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs -** ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

**SUSPENSION SYSTEMS** - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

#### Excludes Grande & TEMS Models

**BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

#### **SUSPENSION SYSTEMS** - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

### OLD MAN EMU SUSPENSION PRODUCTS

#### **SUSPENSION SYSTEMS** - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**BP-51** - The BP-51 is a user adjustable internal bypass 4WD shock absorber that delivers increased comfort and control; both on and off road. All BP-51 shock absorbers are designed and manufactured in-house by ARB using state of the art machining and hard anodising equipment. The body of a BP-51 shock absorber is manufactured using 6061 anodised aluminium to dissipate heat more efficiently than steel or alloy steel and provide superior corrosion resistance.

**MT64** - Big distances, heavy loads, extreme climates. A 4WD demands the most of any gear, quickly sorting out the pretenders. Most shocks aren't up to the task. In response, we've developed the ultimate all-round shock absorber. Designed, engineered and manufactured by ARB's specialised OME suspension engineers, the MT64 is an expertly constructed blend of the Nitrocharger's proven reliability and the durability of BP-51's premium features, making it the perfect all-rounder. ARB's Old Man Emu (OME) shocks thrive in extreme conditions all around the world. We know the challenges a vehicle's suspension faces, and 4WDing brings its own set of challenges. For a 4x4 owner, the dream is to have a set of shocks that will perform the same on the roads during the week, as it does on the tracks on the weekend.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

**Greaseable shackles** - Old Man Emu greaseable shackles and pins facilitate greasing of spring bushes without the need to remove the shackles, greatly reducing the time and effort involved. Urethane bushes require periodic lubrication to ensure longevity.

<sup>1</sup>Volkswagen Service Manual quotes that 'driveshaft bolts are a one use only.'. It is recommended to replace bolts. Replacement bolts Volkswagen Part Number **N90991102** are to be sourced separately.

Old Man Emu offer an extensive range of suspension options for your vehicle. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**Nitrocharger Plus** - During the development of Old Man Emu's Nitrocharger shock absorbers, Ride Control Engineers tailor shock absorber valving to work with the different springs in the range, often resulting in multiple shock absorber options for each vehicle.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**OME leaf springs** - Old Man Emu leaf springs are engineered to provide optimum ride performance irrespective of the conditions in which they operate.

<b>TOW BARS</b>			
<b>HAYMAN REESE TOW BARS</b> - (cont.) - Tow bar ratings are subject to changes in vehicle manufacturer's specifications.			
<sup>20</sup> MY21 and on VTi X/VTi L/VTiL7 loses hands free tailgate function, additional oil cooler may be required (refer to vehicle handbook or Honda Dealer) and RPA disable via dash console.			
<sup>21</sup> RPA Disable via switch on centre console.			
<sup>22</sup> Will fit N Sport model though bumper comes down and is extremely close to smart pin. On some MY20 variants wiring plug's have changed. Plugs can be removed from patch harness and hard wired to vehicle. At time of publication a new patch harness is under development.			
<sup>23</sup> Factory RPA cannot be overridden. However, RPA can be disabled by swith on the dashboard. Where rear parking lights on trailer flicker on some MY18 Models ECU (T04834) should be used.			
<sup>24</sup> Factory fit main towbar on all models. (T03270R) offers complianced towball, mount, towball, hitch pin and shackles only.			
<sup>25</sup> Price Includes (T04839) ECU	298.00		
<sup>26</sup> Large central bumper cut out like original factory towbar. RPA disable via button on centre console, automatic disable is possible through wiring by using tail (T04936).			
<sup>27</sup> Electric variant not homologated for towing.. RPA disable via console, automatic disable is possible through wiring by using tail (T04936) with updated loom that suits MY21 and on models.			
<sup>28</sup> Automatic RPA Disable is possible by using (T04936) tail.			
<sup>29</sup> Bumper Cut Required.			
<sup>30</sup> Trailer Brake Controller brake signal wire to be supplied from brake light.			
<sup>31</sup> Not to be wired to factory plug behind bumper as operational issues may arise with stop lights/indicators. Wire to rear of tail light and run separate to other indicator.			
<sup>32</sup> Use (T04943) for 7 pin flat 1200mm tail and use (T04944) for 7 pin flat 1800mm tail.			
<sup>33</sup> Due to variations between vehicles wiring loom plugs may not fit some variants. Loom can still be used of plug removed and wired direct.			
<sup>34</sup> Wire to rear of tail light and run separate to other indicator.			
<sup>35</sup> On some late model diesel Models replacement might be required of rear muffler due to possible contact with towbar.			
<sup>36</sup> Wire to factory wiring loom under the boot trim on the right hand side.			
<sup>37</sup> RPA and rear autonomous braking, disable via dash.			
<sup>38</sup> RPA disable via instrument cluster. May not be compatible with foot swipe sensor.			
<sup>39</sup> 40X40mm removable hitch.			
<sup>40</sup> Auto Reverse Braking (AEB) can be disabled via infotainment system.

## OLD MAN EMU SUSPENSION PRODUCTS

**SUSPENSION SYSTEMS** - Refer to the latest OME Catalogue for a complete range of products and applications.

Old Man Emu offer a range of suspension options for a selection of vehicles in this section. All suspension kits have variables. For estimated lift, load capacities and to help us provide for your specific requirements please speak to one of our Sales staff. Below are some of the product choices that may be available for your vehicle. Fitting should be performed by trained & licensed OME Fitters.

**OME coil springs** - ARB designs an extensive range of Old Man Emu coil springs for each vehicle, using state of the art micro-alloyed spring steel to ensure superior resistance to sagging and corrosion. With such a wide range on offer, coil springs can be better matched to your specific load requirements and intended vehicle usage. While ride height increases are attained, a great emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

**Torsion bars** - Old Man Emu Torsion Bars dramatically improve your vehicle's ride and handling, both on road and off. Designed and set for optimum ride performance with increased spring rates to suit accessory fitment.

## RECARO SPORTS SEATS

These sophisticated seats are available for a selection of vehicles in this section in a range of styles, colours and fabrics along with a large selection of optional extras. Please speak to one of our Sales staff for further information. Fitment of aftermarket seating requires engineers approval in some States and Territories.

## Customer Supply Terms

The purpose of these terms are to outline the basis that ARB supplies goods (and services) to you. Please read and understand these terms carefully before signing the acknowledgement and agreement.

### 1. Orders

- (a) An order is formed when ARB notifies you (in writing) that it accepts your offer to buy goods or issues an invoice to you.
- (b) ARB may issue a quotation for the supply of goods or offer goods to sell. However, any quotation or offer is not binding on ARB and you have no claim against ARB for ARB failing to supply the goods in accordance with the quotation or offer.
- (c) You may only vary or cancel an order if expressly agreed to by ARB. ARB can't agree to vary or cancel an order in respect of goods that are made-to-order or customised.

### 2. Price

- (a) Except if expressly stated otherwise, the price (and any other amount payable under these terms) excludes GST and excludes any delivery, which is at your cost and risk.
- (b) The price is fixed on formation of an order in accordance with clause 1(a), and may vary from a quotation issued by ARB.

### 3. Payment

- (a) If you have an approved trading account with ARB, you must pay for the goods within the payment period expressly agreed to by ARB.
- (b) If you don't have an approved trading account with ARB, you must pay for the goods at the time the goods are supplied by ARB. ARB may detain your vehicle until all outstanding amounts due and owing to ARB are paid in full.
- (c) If you pay for the goods by credit card, ARB may charge an additional fee representing the transactional cost to ARB.

### 4. Default

- (a) If you fail to pay an amount due and owing to ARB on the due date for payment, ARB may charge interest on the outstanding amount at the penalty rate fixed under section 2 of the Penalty Interest Rates Act 1983 (<https://www.netlaw.com.au/calculate.aspx>) calculated per month (pro-rated) and the interest is added to the outstanding amount on the first day of each month until the outstanding amount is paid in full.
- (b) If you have an approved trading account with ARB and are in default under these terms, all monies payable by you to ARB become immediately due and owing.
- (c) If you are in default under these terms, in addition to the amount due and owing, ARB may claim all costs associated with collection of that amount, including legal and debt collection fees.

### 5. Despatch or collection

- (a) ARB may notify you of dates and times for despatch or collection of the goods. However, any notified despatch or collection date or time is not binding on ARB and you have no claim against ARB for ARB failing to despatch or make available for collection the goods on the notified time and date.
- (b) The bill of lading or carrier's receipt in respect of despatch and delivery of the goods is prima facie evidence of your receipt of the goods.
- (c) Upon receipt of the goods, you must immediately inspect the goods to confirm that the goods accord with the order. Within 7 days after receipt of the goods, you must notify ARB (in writing) of any claims for short or wrong delivery or for any breach of these terms.
- (d) If ARB is unable to supply the goods because of circumstances outside its reasonable control, ARB must notify you as soon as reasonably practicable and may either cancel the order or offer alternative goods for you to select, but is not required to supply the goods the subject of the order.

### 6. Returns

You may return the goods if expressly agreed to by ARB and provided that:

- (a) the goods are in saleable condition
- (b) ARB has provided you with a return authorisation number and freight instructions in respect of the goods
- (c) the goods are returned within 21 days after despatch or collection (at your cost)
- (d) you agree to a return charge of 5% of the value of the goods, which will be deducted from any credit for the returned goods.

### 7. Intellectual property rights

You acknowledge ARB's right, title and interest in all product designs, illustrations, photography, designs, graphics, images, logos, text and other related material to be copyrights, trademarks, registrations and other intellectual property of ARB. You must not, without ARB's prior written consent use, duplicate, reproduce, distribute, display or transmit the material.

### 8. Title and risk

- (a) Risk in the goods passes from ARB to you when the goods are dispatched by ARB to you.
- (b) Title in the goods passes from ARB to you when payment for the goods is made in full. Until title passes, you must:

- (I) store the goods on behalf of ARB as a fiduciary for ARB
- (II) if the goods are sold in the ordinary course of business, keep separate records in relation to the proceeds of the sale of the goods and hold the proceeds of sale on behalf of ARB as a fiduciary for ARB
- (c) If you don't pay for the goods on the due date for payment, you irrevocably authorise ARB's authorised representatives to enter your premises (or any other premises where the goods are stored) and take possession of the goods, without liability for trespass, negligence or compensation to you or any other person.
- (d) You grant to ARB a purchase money security interest (as defined in the *Personal Property Security Act 2009 (Act)*) (**PMSI**) in the goods. ARB may register the PMSI, and you:
  - (I) must immediately provide any further information or consent to ARB necessary to do this
  - (II) waive your right to receive any notification from ARB required under the Act

**9. Liability**

- (a) ARB's liability in respect of the state, quality or condition of the goods is limited to a liability arising under the *Competition and Consumer Act 2010* or any other applicable law. If the goods are not of a kind ordinarily acquired for personal, household or domestic use, ARB's liability is limited to one or more of the following:
  - (I) replacement of the goods or the supply of equivalent goods
  - (II) repair of the goods
  - (III) payment of the cost of replacing the goods, acquiring equivalent goods or having the goods repaired
- (b) ARB's liability to any person or entity for loss or damage (consequential or otherwise) caused by or resulting from a failure, defect or deficiency in the goods is limited to the maximum extent permissible by law.

**10. General**

- (a) The laws of Victoria apply to these terms, and you agree to submit to the jurisdiction of the courts of Victoria.
- (b) These terms apply to all orders formed on or after 01/03/2019, and takes precedence over and replaces in full any other representation, terms or conditions, including any terms you may include but have not been expressly agreed to by ARB.
